Lifetime Achievement Award Honors William Bruggeman

“CETA’s prestigious Lifetime Achievement Award honors an individual who has made significant contributions to the pressure washer industry. This year’s recipient was William Bruggeman, founder of CAT PUMPS.

His vision of manufacturing a longer lasting, dependable pump in a variety of different performance models encouraged the development of a multitude of pressure cleaning applications. In 1968, Mr. Bruggeman started CAT PUMPS and developed the first high pressure pump that offered longevity and produced pressures in excess of 700 PSI.

Today, the company’s pumps are used in hundreds of industrial applications. Described by his coworkers as a generous, thoughtful, family-oriented man, Mr. Bruggeman ran his company with the same compassion.”
