

smooth ride

We know it gets costly every time your pump is down or it doesn't perform to expectations.

That's why we have invested our time and efforts in designing a packing and plunger that seal properly and last longer than any other.

Our solid ceramic, concentric plungers deliver a smooth ride and maximize the life of our special blend chevron packings.

It's the quality you pay for. It's the quality that will assure maximum profits in the long run. It's been proven. CAT PUMPS last longer and perform more consistently than any other pump.

Up to 320 GPM, 7000 PSI for central cleaning, pipe/tube cleaning, boiler feed, homogenizing, hydrostatic and misting.

*Positive Displacement
High Pressure Liquid Pumps*

The Pumps with Nine Lives
