

Solutions for Mobile Applications

High-Pressure Pumps and Systems

Product Quality, Reliability and Support You Expect

www.catpumps.com

Outruns, Outlasts and Outperforms the Competition

Quality that keeps your equipment running

The high-pressure pump is critical to hydro excavating, jetting, washdown and street cleaning equipment, with the need to perform in a wide range of environments. That's why operators working in the heat of Texas or the cold of Alberta rely on Cat Pumps to provide the longest-lasting, most reliable products wherever they are used.

Our commitment to produce the highest-quality, longest lasting products available is supported by maintaining a rigorous zero defect quality assurance program to guarantee consistently high-quality products — every time.

Cat Pumps Benefits:

- Jobs done on schedule with less downtime
- Fewer repairs for reduced maintenance costs
- Fast turnaround for parts & pumps – 24 hour shipping

Engineering and Technical Support

Cat Pumps offers engineering and technical support for product selection, installation, maintenance, pump repair, troubleshooting and custom designed systems.

Live Support available M-F, 8:00 a.m. to 5:00 p.m. CST, (763) 780-5440 and at techsupport@catpumps.com.

Product service videos located at www.catpumps.com

Readily Available – Off the Shelf

In addition to receiving the highest quality products available, Cat Pumps customers also benefit with the following:

- Pumps and repair parts are stock items
- Quick response with 95% of orders ship within 24 hours
- Worldwide sales and service channel stocking genuine Cat Pumps products

Mobile Applications

Hydro Excavating

Remote locations and demanding environments require products that keep equipment running longer. Cat Pumps is the high-pressure pump of choice by leading contractors and equipment builders.

- Solid shaft pumps for hydraulic motors, gearbox or belt drive, and hollow shaft pumps for direct engine driven
- Excellent range flow and pressure ratings to get the best pump for the job, from small trailer units to full-size trucks
- Service parts are on-the-shelf for 24 hour shipping

Jetting

Long-lasting and highly dependable pumps and systems help jetters cut through the toughest jobs. When productivity and reliability are important, do what the market leaders do and trust Cat Pumps to keep equipment running.

- Pressures to 10,000 psi cover a wide range of jetting applications
- High-flow/high-pressure pumps get more work done in shorter amount of time
- Full line of accessories available with off-the-shelf shipping

Street Sweeping/Dust Control

Street sweeping equipment runs on a grueling non-stop schedule. This equipment is built with high-quality components, which is why the leading manufacturers specify Cat Pumps products.

Cat Pumps supplies a variety of products to this market:

- High-pressure water pumps and sub-assemblies
- Pump mounting and drive components
- Pressure unloaders and regulators

Portable Restroom Cleaning/Washdown

Many service trucks are built with high-pressure cleaning units. Commonly operating at 500 to 700 psi, this pressure range provides water power to clean surfaces in a shorter amount of time.

- Pump/motor subassemblies for 12 VDC and 24 VDC (1/3, 1/2, 3/4 and 1 hp)
- Pumps can be used with downstream foaming or other sanitation cleaning agents for highly effective cleaning

Auto Start/Stop Control

Auto Control (12VAUTO80) with Pump, Motor Assembly

Auto start/stop allows pressure washers to run only when there is demand. When the trigger gun is opened, the pump motor automatically starts the pressure washer. The motor remains running until the shut-off gun is closed. This feature increases pump and motor life by only running when necessary.

The Cat Pumps auto start/stop control allows for easy system integration into new trucks, or for upgrades on existing trucks. The motor control wiring is already taken care of, including the fuse, relay, pressure switches, on/off switch and leads to the motor. Connect to the positive and negative terminals on top of relay control box, hook up the inlet and discharge plumbing, and the pressure washer is ready to go.

Custom-Engineered Power Units

You define. We design.

Cat Pumps also offers custom engineered systems (power units) that are designed to meet your requirements. All units are factory flow and pressure tested before shipment. Complete our online Power Unit Quote Form online or call for a quote.

Features:

- Electric, gas, diesel, hydraulic and pneumatic drive options
- Heavy-duty construction
- Compact, streamline design
- Various control options to meet application needs
- Stationary or portable design
- Corrosion-resistant options
- System accessories

Mounting and Drive Accessories

Bell Housings for Hydraulic Motors Provide Assembly Convenience

Cat Pumps bell housings offer a fast and convenient way to mount hydraulic motors to high-pressure pumps in a direct-drive configuration. Bell housings are designed to accept SAE "A", SAE "B", and SAE "C" mounts to fit a variety of pumps rated to 50 gpm and 10,000 psi. Bell housings are available as individual components or assembled as a complete pump/motor assembly. Take advantage of Cat Pumps off-the-shelf service for this highly convenient line of hydraulic motor bell housings.

Features:

- Optimal alignment reduces side-loading for longer life, trouble-free operation
- Compact direct mounting reduces space requirement
- Cast from lightweight, high-strength aluminum alloy
- Ease of assembly reduces fabrication costs
- Slotted housing allow easy access to coupler set screws
- Available as a complete drive package for convenient assembly

Converting Unloader into a Relief Valve

All trapped pressure unloaders can be configured as a pressure relief valve by removing the check valve from the discharge fitting. To order a relief valve, add ".100" at the end of the unloader part number.

Example: 7537 = Pressure Unloader and 7537.100 = Pressure Relief Valve.

Pop-Off Valves

Secondary pressure control.

- Opens when system exceeds preset pressure.
- Lightweight, compact design quickly and conveniently mounts directly into discharge line.
- Ultra compact models for portable systems.

Vari-Nozzles

Used with downstream chemical injector to apply chemical at low pressure.

- Adjusts spray angle from 0° to 60° for cleaning flexibility.
- Color coded ID plug for easy identification.

Pulsator Assemblies

Converts water-pressure pump to a water-jetting pump.

- Eliminates traditional dry pumping chamber that causes damage to pump.
- Easily mounts in the manifold inlet plug on most Cat Pumps models.

Pump Protector

Cat Pumps Pressure Washer Pump Protector guards your pressure washer pump during extended storage — there is no better way to protect your pump. Order part number 6208 for a case of six bottles (12 fluid ounces each).

Features:

- Excellent winterizer: protects pumps from freezing to -25° F
- Lubricates seals, valves and valve seats to prevent sticking
- Inhibits corrosion and mineral deposits
- Environmentally friendly — 100% biodegradable
