Models 1810, 1810K

- Die cast aluminum crankcase means high strength, lightweight, and excellent tolerance control.
- 2. Oversized crankshaft **bearings** provide ex-tended bearing life and pump performance.
- **3.** Chrome-moly **crankshaft** provides unmatched strength and surface hardness for long life.
- **4.** Matched oversized TNM **connecting rods** noted for superior tensile strength and bearing quality.
- 5. Special stainless steel high strength **plunger rods** for high load bearing and longevity.
- The stainless steel slinger provides back-up protection for the crankcase seal, keeping pumped liquids out of the crankcase.
- Special concentric, high-density, polished, solid ceramic plungers provide a true wear surface and extended seal life.
- Manifolds are a high tensile strength stainless steel for long term, continuous duty and corrosion resistance.
- 100% wet seal design adds to service life by allowing pumped liquids to cool and lubricate on both sides.
- **10.** Precision stainless steel **seat and ceramic ball** provide true sphericity and extended life.
- Special UHMW or PTFE supported V-Packings for high pressure stability, chemical compatibility and extended life.
- **12. Crossheads** are 360° supported for uncompromising alignment.

△ CAUTIONS AND WARNINGS

All high-pressure systems require a primary pressure regulating device (i.e. regulator, unloader) and a secondary pressure relief device (i.e. pop-off valve, relief valve). Failure to install such relief devices could result in personal injury or damage to pump or property. Cat Pumps does not assume any liability or responsibility for the operation of a customer's high-pressure system. Read all CAUTIONS and WARNINGS before commencing service or operation of any high-pressure system. The CAUTIONS and WARNINGS are included in each Service Manual and with each Accessory Data sheet. CAUTIONS and WARNINGS can also be viewed online at www.catpumps.com/dynamic-literature/cautions-and-warnings or can be requested directly from Cat Pumps.
