

# PULSATOR ASSEMBLY

2.0–20.0 GPM | 2,000–4,000 PSI

## Pulsator Assemblies Make Pump Conversion Easy

Converting a standard high-pressure pump to a jetting pump can be easily done with the use of a pulsator assembly from Cat Pumps. Once converted, pumps can supply the high-pressure, pulsating water often required for sewer and jetting applications. Pulsator assemblies eliminate the traditional dry pumping chamber and the possibility of dead-heading the pump. This prolongs the life of the pump seals, reducing maintenance and downtime on jetter pumps.

Cat Pumps offers a complete line of pulsator assemblies to cover a variety of plunger pump models. See back page for a complete listing. Trust Cat Pumps to build durable products to keep equipment running longer.

When it needs to run, choose Cat Pumps.
