38 FRAME BLOCK-STYLE PLUNGER PUMP

Stainless Steel 3810 Model:

Model 3810 Shown
(Shaft protector included; mounting rails sold separately)

FEATURES

- Block-style 304 stainless steel manifolds deliver high structural strength and corrosion resistance for demanding industrial applications.
- PTFE and acetal packing assemblies provide added stability at high pressure while extending seal life.
- Matched connecting rods and oversized bearings increase load capacity and significantly extend bearing life.
- Special high-density, polished, concentric plungers provide a true wear surface and extended seal life.
- V-packings and low-pressure seals are completely lubricated and cooled by pumped liquid, greatly increasing service life.
- A low-unsweped-volume design maximizes volumetric efficiency, reduces energy consumption, and delivers consistent flow.
- Pump comes standard with NBR seals.

Manifolds are 304 stainless steel. Cylinders are 17-4SS stainless steel. Valve assemblies are made with 304 and 17-4SS stainless steel components. Internal packing assembly includes acetal male adapters, PTFE female adapters and V-packings.

See Parts List to confirm material compatibility with the fluid pumped before use.

CAUTIONS AND WARNINGS

All high-pressure systems require a primary pressure regulating device (e.g. regulator, unloader) and a secondary pressure relief device (e.g. pop-off valve, relief valve). Failure to install such relief devices could result in personal injury or damage to pump or property. Cat Pumps does not assume any liability or responsibility for the operation of a customer's high-pressure system.

Read all CAUTIONS and WARNINGS before commencing service or operation of any high-pressure system. The CAUTIONS and WARNINGS are included in each Service Manual and with each Accessory Data sheet. CAUTIONS and WARNINGS can also be viewed online at www.catpumps.com/dynamic-literature/cautions-and-warnings or can be requested directly from Cat Pumps.
